

Common University Entrance Test (CUET Science UG) 2022 - Everything You Need to Know

Mr. JC Chaudhry

Founder & Chairman

Aakash Educational Services Limited (AESL)

As the Class XII Board examinations get over, the next step for the students is to start preparing for the entrance examinations. Starting this year, a common test and not

Class XII scores only will determine admission to undergraduate courses in more than 70 universities. CUET or Common University Entrance Test becomes "one nation, one entrance test" that will provide a common platform and equal opportunities to students across the country, thereby making admissions more streamlined and student-friendly.

How to Prepare for CUET (Science UG) 2022?

To gain an edge over the growing competition, students need to start their preparation for CUET 2022 at the earliest. Given below are some tips that will help students to prepare well for the upcoming CUET (Science UG):

Understand the Examination Pattern & Syllabus

The first and the most important preparation tip is to have a clear understanding of the exam pattern and syllabus. It helps to get an idea of the types of questions asked, the total duration of the exam, topics covered, marking scheme and other important details based on which students can plan their preparation.

CUET (Science UG) Examination Details

Follow a well-planned Study Schedule

With CUET 2022 approaching near, students need to make a study schedule. A well-planned study schedule is important to not only cover the vast syllabus but also prepare well for the exam. Students should divide their time strategically so that they are able to devote more time to the weak areas and chapters with high weightage.

In addition, students should avoid long hours of study. They should take short and regular breaks in between their study sessions. This will help refresh and re-energise their mind, thereby resulting in productive learning. Further, it is important to monitor the progress on the weekly basis. This will help in evaluating the preparation level and taking steps in improving it.

Solve CUET Mock Tests

Students should solve part and full syllabus CUET mock tests and preferably in a proctored environment. Since CUET will be conducted in online mode, students should solve the mock tests in online mode and at the same time as that of the exam as it will help acclimatize their body clock with the exam timings and attune their alertness and concentration levels accordingly. This will not only strengthen students' preparation methods but also build up their confidence level. Further, after solving a mock test, students should analyse and identify their mistakes and improve them. Additionally, mock tests also help students evaluate the time spent on each section and structure it accordingly. You can also visit <https://www.aakash.ac.in/cuet-courses> for CUET Sample Paper.

Time Management

When it comes to cracking competitive exams, time management plays a crucial role. Students need to utilize every minute wisely so that they can attempt all the questions. For that, they need to work hard on their speed. They should solve as many mock tests and previous years' papers as possible on the CUET Exam pattern. Aakash BYJU'S Test & Discussion Series Course and Test Series Course offer as many as 7 Part Syllabus and 7 Full Syllabus Tests.

Crash Course

Preparing for competitive entrance exams requires a lot of focus and dedication. Joining a Crash Course can help students revise and prepare for CUET in the limited time available. Aakash BYJU'S Crash Course for CUET is aimed at comprehensive preparation for the exam with an exhaustive coverage of syllabus and regular tests. Aakash BYJU'S Crash Course is a rapid-learning module for Science UG courses targeted at complete & thorough revision of the entire CUET syllabus within an approximate time span of 24 days.

Manage Exam Stress

Preparing for competitive exams and boards simultaneously can be stressful for students. However, students need to deal with stress as it can severely affect their preparation. Any negative thought that comes across the mind should be replaced with a positive one. Students should keep calm and focus on their studies. Drinking a lot of water, refreshing juices, smoothies and eating nutritious food can do wonders for the brain. Additionally, students can indulge in regular exercise, go for a short walk or do yoga/meditation to calm the mind. Further, it is important to have a silent, clutter-free zone and an environment with minimal distractions while studying.

NOTE: Details regarding CUET, including the date of exam and test pattern are as available on the date of writing of this article. For complete information and latest updates on CUET 2022, please visit <https://cuet.samarth.ac.in/>
